

Git Kata: Tagging of the commits

- Veja quais tags foram criadas.

```
PS C:\Users\rappa\Documents\Projetos\ExerciciosTMS\git-katas\git-tag\exercise> git tag
dummy
dummy2
```

- Faça um novo commit e crie uma nova **tag anotada**.

The screenshot shows the Visual Studio Code interface. The Explorer pane on the left shows the file structure of the 'git-tag' repository, including 'exercise', 'dummy.txt', and 'index.html'. The Code Editor pane shows the content of 'index.html', which is an HTML document. The Terminal pane at the bottom shows the execution of several git commands: 'git tag dummy', 'git tag dummy2', 'git add index.html', 'git commit -m "Novo commit para teste de tag"', and 'git tag -a v1.0 -m "Versão 1.0"'. The output of these commands is visible in the terminal.
