

Git Kata: Basic Branching

A tarefa:

1. Use git branch para ver os dois branches relevantes para este exercício.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching> .\setup.ps1
Initialized empty Git repository in C:/Users/rapha/Documents/Projetos/ExerciciosTMS/git-katas/basic-branching/exercise/.git/
[master (root-commit) 186af82] dummy commit
1 file changed, 1 insertion(+)
create mode 100644 dummy.txt
Switched to a new branch 'second-branch'
Switched to branch 'master'
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
* master
  second-branch
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> 
```

2. Em qual branch você está?

Master.

```
* master
```

3. Use git branch meu-branch para criar um novo branch chamado **meu-branch**.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch meu-branch
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
* master
  meu-branch
  second-branch
```

4. Use git branch novamente para ver o novo branch criado.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
* master
  meu-branch
  second-branch
```

5. Use git switch meu-branch para mudar para o seu novo branch.

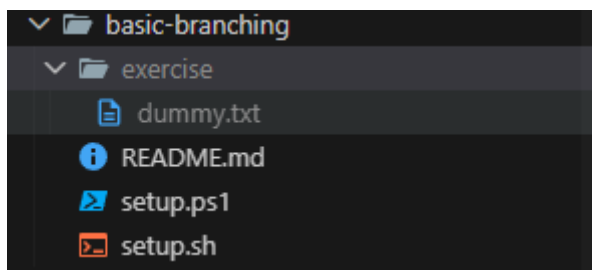

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch meu-branch
Switched to branch 'meu-branch'
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
  master
* meu-branch
  second-branch
```

6. Como a saída do git status muda quando você alterna entre o master e o novo branch que você criou?

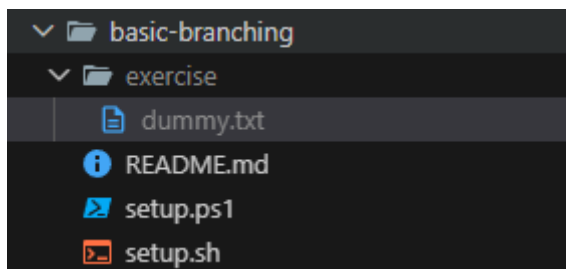

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
master
* meu-branch
second-branch
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git status
On branch meu-branch
nothing to commit, working tree clean
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch master
Switched to branch 'master'
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git status
On branch master
nothing to commit, working tree clean
```

7. Como o espaço de trabalho (workspace) muda quando você alterna entre os dois branches?

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch master
Switched to branch 'master'
```

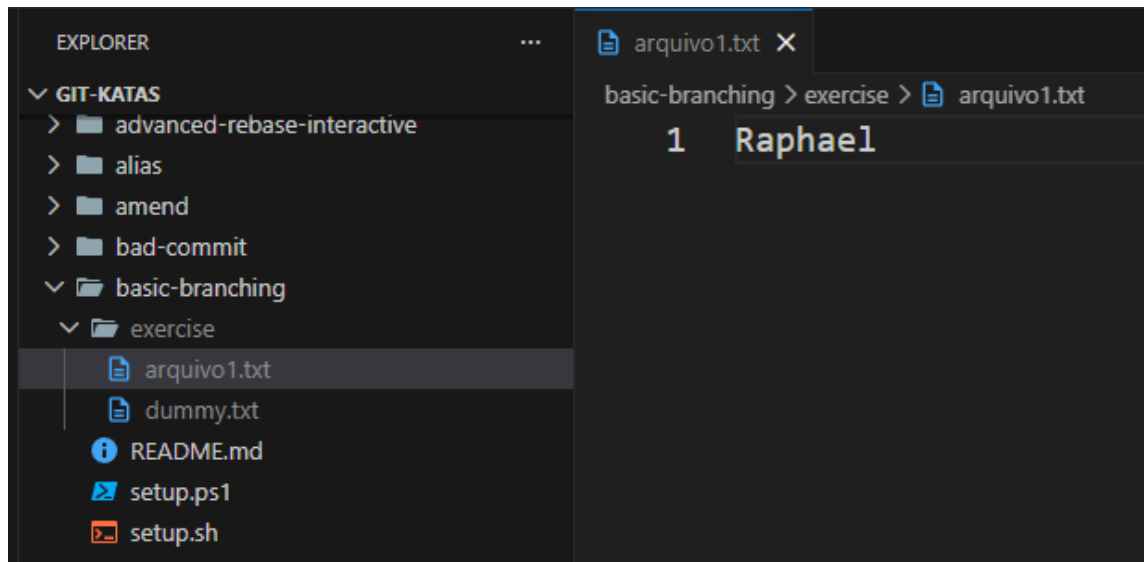

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch meu-branch
Switched to branch 'meu-branch'
```

8. Certifique-se de estar no seu branch **meu-branch** antes de continuar.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
master
* meu-branch
second-branch
```

9. Crie um arquivo chamado arquivo1.txt com o seu nome.

10. Adicione o arquivo e faça o commit com essa alteração.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git add .
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git status
On branch meu-branch
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
    new file:   arquivo1.txt

PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git commit -m "ok"
[meu-branch bbf1c33] ok
1 file changed, 1 insertion(+)
create mode 100644 arquivo1.txt
```

11. Use git log --oneline --graph para ver seu branch apontando para o novo commit.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git log --oneline --graph
* bbf1c33 (HEAD -> meu-branch) ok
* 186af82 (second-branch, master) dummy commit
```

12. Volte para o branch chamado master.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch master
Switched to branch 'master'
```

13. Use git log --oneline --graph e observe como o commit que você fez no branch **meu-branch** não aparece no branch master.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git log --oneline --graph
* 186af82 (HEAD -> master, second-branch) dummy commit
```

14. Crie um novo arquivo chamado arquivo2.txt e faça o commit desse arquivo.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git add .
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git status
On branch master
Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        new file:   arquivo2.txt

PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git commit -m "ok 2"
[master 7229fdf] ok 2
1 file changed, 0 insertions(+), 0 deletions(-)
create mode 100644 arquivo2.txt
```

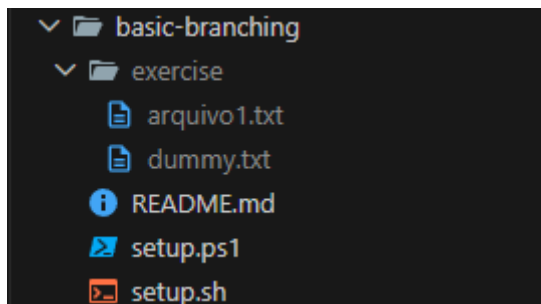

15. Use git log --oneline --graph --all para ver seu branch apontando para o novo commit e notar que os dois branches agora possuem commits diferentes.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git log --oneline --graph --all
* 7229fdf (HEAD -> master) ok 2
| * bbf1c33 (meu-branch) ok
|/
* 186af82 (second-branch) dummy commit
```

16. Mude para o seu branch **meu-branch**.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git switch meu-branch
Switched to branch 'meu-branch'
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git branch
  master
* meu-branch
  second-branch
```

17. O que aconteceu com seu diretório de trabalho? Você consegue ver o seu arquivo2.txt?

18. Use git diff meu-branch master para ver a diferença entre os dois branches.

```
PS C:\Users\rapha\Documents\Projetos\ExerciciosTMS\git-katas\basic-branching\exercise> git diff meu-branch master
diff --git a/arquivo1.txt b/arquivo1.txt
deleted file mode 100644
index 821bc12..0000000
--- a/arquivo1.txt
+++ /dev/null
@@ -1 +0,0 @@
-Raphael
\ No newline at end of file
diff --git a/arquivo2.txt b/arquivo2.txt
new file mode 100644
index 0000000..e69de29
```
