

Git Kata: Basic Staging

Você está no seu próprio repositório. Existe um arquivo chamado file.txt.

- Qual é o conteúdo de file.txt?

- Sobrescreva o conteúdo de file.txt: `echo 2 > file.txt` para alterar o estado do arquivo no diretório de trabalho (ou `sc file.txt '2'` no PowerShell).

```
PS C:\Users\rappa\Documents\Projetos\ExerciciosTMS\git-katas\basic-staging\exercise> sc file.txt '2'
```

- O que o `git diff` mostra?

```
PS C:\Users\rappa\Documents\Projetos\ExerciciosTMS\git-katas\basic-staging\exercise> git diff
diff --git a/file.txt b/file.txt

Porque nenhuma alteração foi adicionada ao staging.

- Execute `git add file.txt` para adicionar suas alterações à área de staging.

- Explique o que está acontecendo.

O Git está mostrando diferenças entre três estados diferentes do mesmo arquivo.

- Execute git status e observe que file.txt aparece duas vezes na saída.
